

Welcome To

# Llamanodes.net

LlamaNodes opens up a world of boundless possibilities by surpassing the constraints of conventional finance. Enter LlamaNodes' dynamic environment and get a firsthand look at the cutting edge of bitcoin innovation.

Who We Are

# About Us

## **Introducing LlamaNodes Staking: Investing in and Strengthening Digital Assets!**

We're glad you found LlamaNodes, your reliable partner in the worlds of blockchain technology and decentralised finance (DeFi). We at LlamaNodes are enthusiastic about coming up with new ways to help our users reach their full potential in the digital economy, which is changing quickly.

We specialise in safe and dependable staking services for a number of well-known coins, such as APTOS, ATOM, OSMOSIS, Optimism, Matic, Fantom, NEAR, and SUI. If you stake with LlamaNodes, you can make silent income and help keep these blockchain networks safe and stable at the same time.

Besides our staking services, we also have a number of royalty and prize programmes that are meant to thank our regular users. This site, LlamaNodes, has something for everyone, from experienced investors to people who are new to DeFi.

## Process

# How to Generate Cryptocurrency

Cryptocurrency is generated through a process called mining, where powerful computers solve complex mathematical problems to validate and record transactions on a decentralized network, such as blockchain, in exchange for newly minted coins as rewards.

Cosmos Atom

# COSMOS ATOM

A major concern for some in the crypto industry centers on the levels of fragmentation seen in blockchain networks. There are hundreds in existence, but very few of them can communicate with each other. Cosmos aims to turn this on its head by making this possible.

Cosmos is described as “Blockchain 3.0” — and as we mentioned earlier, a big goal is ensuring that its infrastructure is straightforward to use.

Osmosis

# OSMOSIS

Osmosis has customizable liquidity pools. Unlike Uniswap, where LPs can provide liquidity only to a two-token pool with an equal ratio, Osmosis allows for providing liquidity to pools with several tokens and unequal ratios.

Coordination between stakeholders is of equal importance, which is why liquidity pool shares on Osmosis are not only used to calculate the fractional ownership of a liquidity pool, but also the right to participate in the strategic decision-making of the liquidity pool as well.

Fantom

# FANTOM

Fantom attempts to use a new scratch-built consensus mechanism to facilitate DeFi and related services on the basis of smart contracts.

The mechanism, Lachesis, promises much higher capacity and two-second transaction finalization, along with improvements to security over traditional proof-of-stake (PoS) algorithm-based platforms.

Through token sales in 2018, Fantom raised almost \$40 million to fund development.

Matic

# POLYGON MATIC

Polygon is self-described as a Layer 2 scaling solution, which means that the project doesn't seek to upgrade its current basic blockchain layer any time soon.

Polygon uses a customized version of the Plasma framework which is built on proof-of-stake checkpoints that run through the Ethereum main-chain.

Sui

**SUI** 

Sui's innovative architecture offers low-latency transactions with stable transaction fees, high throughput through horizontal scaling and parallelized execution, and empowers developers with powerful capabilities and tools to craft the next generation of Web3 applications.

At the heart of Sui's uniqueness lies its object-oriented design, offering a new way of developing on blockchain. Offering powerful capabilities in a way that ensures deep composability with important developer and user safety measures.

Near

# NEAR

NEAR uses its Nightshade technology to improve transaction throughput massively. Nightshade is a variation of sharding, in which individual sets of validators process transactions in parallel across multiple sharded chains, improving the overall capacity of the blockchain. In contrast to “regular” sharding, shards in Nightshade produce a fraction of the next block, called “chunks.” In doing so, NEAR Protocol is able to achieve up to 100,000 transactions per second and achieve near-instant transaction finality thanks to a one-second block cadence while simultaneously keeping transaction fees at virtually zero.

# OP

Optimism

## OPTIMISM

Optimism aims for the minimum number of moving parts while building a layer-two solution for Ethereum. In practice, this means using proven Ethereum code and infrastructure when possible. Optimism thus aims to keep its code as simple as possible and work directly with existing codebases.

Transactions are submitted to Ethereum without direct proof of validity and can be challenged for a certain period of time (currently seven days). After that, a transaction is considered final. That is why withdrawals from Optimism to Ethereum take seven days to complete.

Aptos

# APTOS

For a start, the Aptos team claims that its network can process over 150,000 tps. By comparison, Ethereum's mainnet tps is around 12 to 15.

This high transaction throughput is possible through a parallel execution engine (Block-STM) — a byzantine fault-tolerant (BFT) PoS consensus mechanism. For context, most blockchains execute transactions sequentially, which means that a single failed transaction or high demand on the network could hold up the entire chain.

## Refer Your Friends

# Referral Program

If you want to enjoy using LlamaNodes , share your referral link with your friends and colleagues to earn 10% to 30% of their revenue.

### How it Works

When you refer someone to LlamaNodes Premium using your unique referral link. Persons who use the referral code, receive 8% Matching Bonus 1:1 Matching in credits and all Premium features as soon as they spend \$50 with LlamaNodes Premium. Person who gives out the referral code \*EARN 10% to 30% \* of the revenue they bring to LlamaNodes This is activated after the referee enters in the Matching Bonus Royalty Program for up to 36 Months.

How to Get

# Withdrawal

You can stake in SUI, Polygon (Matic), Optimism (OP), Fantom (FTM), APTOS (APT), COSMOS (ATOM), NEAR PROTOCOL (NEAR), OSMOSIS (OSMO).

\*User will need to capture the receiving address of above mentioned Blockchain Addresses only and that will be one chance to capture the Blockchain Receiving Address, enter Blockchain Address carefully, once submitted never changed. All staking income and other rewards will be credited automatically in your given Blockchain Address thrice in a month on 5, 15 and 25.

Note- You will get SUI (SUI), Polygon (Matic), Optimism (OP), Fantom (FTM), APTOS (APT), COSMOS (ATOM), NEAR PROTOCOL (NEAR), OSMOSIS (OSMO). equivalent value of USDT.

Our Features

# Advantages with **Llamanodes**

LlamaNodes is a leading platform for cryptocurrency staking, specializing in coins like APTOS, ATOM, OSMOSIS, Optimism, Matic, Fantom, NEAR, and SUI. Our platform is designed to simplify the staking process, offering guaranteed returns, matching bonuses, royalties, and other benefits. We provide a user-friendly interface, expert guidance, and a range of tools to help customers make informed decisions. With LlamaNodes, customers can stake with confidence, knowing that their investments are secure and that they're maximizing their returns.

Moreover, LlamaNodes offers a unique opportunity for customers to earn passive income through our royalty program. This program allows customers to earn ongoing income based on the performance of their staked assets. With LlamaNodes, customers can benefit from their investments over the long term, enjoying a reliable source of revenue. Our platform is built on cutting-edge technology, ensuring the highest levels of security and reliability. With LlamaNodes, customers can stake with confidence, knowing that they're maximizing their returns while minimizing risk.

How to Enter

# Let's Start

\*Deposit at least \$50 into your LlamaNodes account to activate Premium Referral Code.

\*Generate a referral code that is tied to your web3 wallet. Share it and spread the LlamaNodes word!!

Earn 10% to 30% of the revenue that your referrals bring to LlamaNodes.

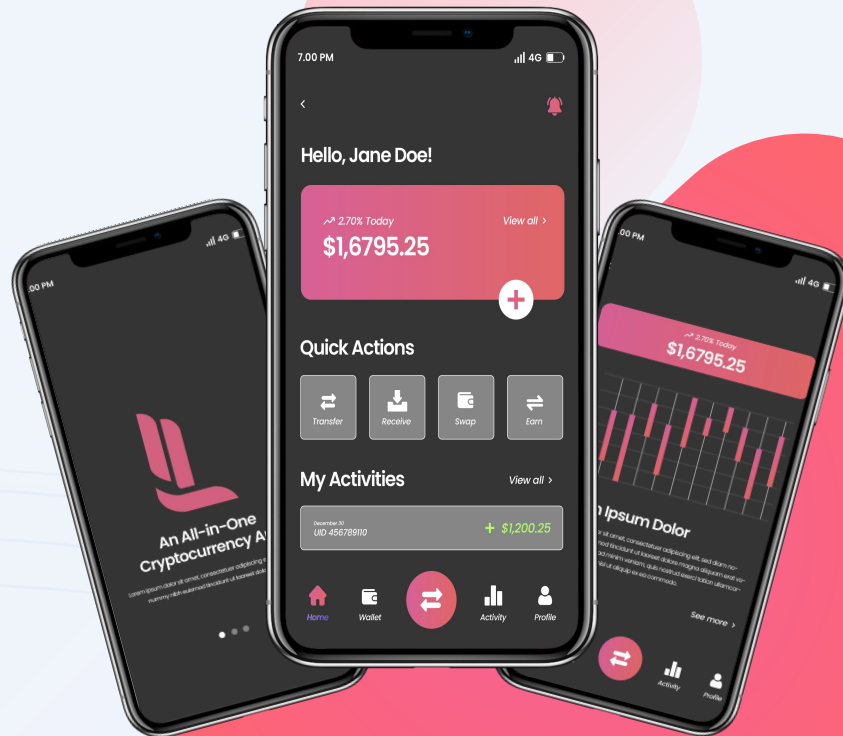

\*User must keep into mind , earning of network income would be 5X of their initial amount they invested with Llamnodesweb3. After that user will re-invest the account to continues earning with LlamaNodes.

\*Daily capping of income would be equivalent their current package.
